

## HOW TO SPEND

This doc will explain where to invest your money in the game the smart way following Vodoo's way to become as strong as him without spending too much.

### Summary

Purchases priority : .....	2
Purchases under promotion: .....	7
Daily upgrades : .....	8

## Purchases priority :

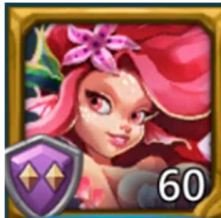

These purchases are what a rally lead absolutely needs. It's what will give the more stats and overall be necessary for wonder fights.

We will give you the cheapest solutions to achieve that goal asap.

Considering you are missing everything listed below, the monthly budget should be around 130\$/month.

## Heroes :

There is no need to buy a lot of heroes to succeed, only 6 are absolutely necessary.

Songstress of the Sea is a powerful mixed hero mainly used as a leader. She's useful in mono rallies, mixed rallies but also 055 comps. So, she is necessary for a rally lead.

**Price with 5\$ packs only: 110\$~**

Lore Weaver is also a very strong mixed hero. Also necessary for mixed, she will be a very important hero for any cavalry composition. She's also a very good colosseum hero. She can also be replaced by Storm Fox which has the same stats but is cheaper.

**Price with 5\$ packs only: 165\$**

Cursed Hunter, Snail Princess and Don Guapo are the 3 wonder heroes necessary to reach 3.9m army wonder size. They each upgrade the size by 200k. It's a huge advantage to have against someone who doesn't have such army size and be on an equal footing with everyone that has 3.9m. Don Guapo and Cursed Hunter are both useful on colosseum as well.

**Price of each with 5\$ packs only: 110\$**

Finally: Chronicler. You may ask how much will it cost to upgrade your ambrosial cup? Well, don't ask anymore: Chronicler is stronger and much cheaper than any piece of gear. She brings 15% counter boost for every troop type which is a huge amount. Basically, counter is a different stat from attack and other stats that can go up to 60%, and chronicler makes a huge difference in everyday fights.

**Price with 5\$ packs only: 165\$**

Heroes are essential to succeed your rallies. They are a long term investment, but much stronger than any piece of gear. One of the best hero comp looks like this : You don't really need to buy any other heroes :

Though, having Berserker, Dream Witch and Storm Fox are also really solid choices. I'm just showing you what the cheapest comp looks like.

### Jade Wyrms:

At the same time as heroes, a familiar in particular is essential and equivalent to Chronicler, Jade Wyrms:

Wyrms got the same qualities as Chronicler, which is 15% counter boost. Chronicler+Jade gives a 30% counter boost in total which is a huge amount, twice the amount against players that did not invest in them. Jade is also now available in guild fest rewards, making him even cheaper than before.

**Price with 5\$ packs only: ~200\$**

### Artifacts:

The last part in which to invest money is artifacts. It's the most worth place to spend money apart from heroes. For a very cheap amount of money, they offer a looooot of stats. No need to buy scam packs that gives 10.000 coins immediately, here's a few monthly packs to purchase to get daily coins and upgrade slowly but surely your artifacts.

1 – 30 Days' Supply Chest – 10\$ per month

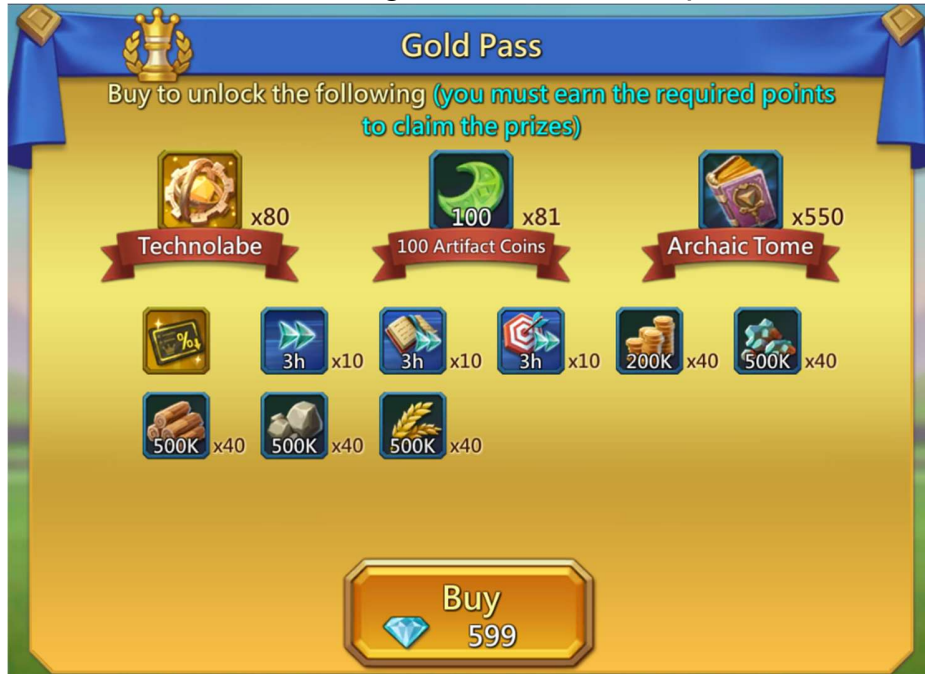

2 – Login Gifts – 2\$ every 21 days

Login Gifts	Bonus Gifts
Day 3 	 x5  x15  1 x230
Day 4 	 x5  x5
Day 5 	 x5  x1  1 x230
Day 6 	 x3  x6  1 x230

### 3 – Gold Pass from Kingdom Labors – 5\$ per month

### 4 – 7 Day Dash Bundle – 2\$ per week

In addition to giving a lot of artifact pieces, all these packs will help you keep up with gems, speed ups etc...

With all previous long-term investments, your results should improve dramatically. The most important thing to remember is that gear is not everything. We have proven this sufficiently by destroying numerous multi champion accounts thanks to active stats outside of equipment.

### **ESTIMATED INVESTMENT PER MONTH: ~130\$**

#### **Purchases under promotion:**

After the « mandatory » purchases we have the purchases under promotion. It's a little less long term than heroes, it's more about taking advantage of the 1+1 offers or certain exclusive and time-limited packs like we were able to get at Christmas with the 10 astralites and 100 champion chests for 5\$.

Among these purchases under promotion, depending on where you are in long-term investment and in your other familiars... equipments etc... We can get brilliant orbs, gear in general, astralites, pact 5 familiars etc... Anything that has not been stated in the significant investment part is not something you should prioritize. It all depends on you and your priorities.

Anyway, these extra investments like orbs, astralites etc... should not be prioritized before heroes, jade wyrm....

(few examples of packs to 1+1 or purchase during events):

## Daily upgrades :

Daily upgrades are often neglected because they are very very long-term and require certain regularity, although they are free. This is why we decided to include them because they are as important as stats obtained by investment.

## Familiars skills :

We often forget this side of the familiars. Though, a lot of these stats are awesome to get and does not need real investment. (except some fragments)

Familiars with army stats: Bunny, Mecha Trojan, Bon Appeti, Grim Reaper, Hell Drider, Gargantua, Trickstar, Noceros, Mole Shaman, Frostwing, Blackwing, Queen Bee, Tidal Titan and Jade Wyrn.

In total, that's quite a lot of statistics for free, and yet I did not count the familiars giving defense stats which can be left aside as long as ATK or HP stats are available.

So dont forget to do it everyday!

### Vergeway :

Finally, here's a totally forgotten aspect of the game, the vergeway.

Very long to finish, and even longer to assemble the cards, many players abandoned it. However, it is important to note that each card gives stats for certain level reached.

Many levels are useless. However, given the number of cards and 1 or 2 small useful stats that they give, everything added together easily could give 15% atk and 30% hp (this has not been calculated)

It is also possible to pay 1\$ to obtain a few additional cards. The choice is yours but opening the 8 daily chests is free and beneficial.
